

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. 11/10, 12/10, 13/10, etc,

Why?

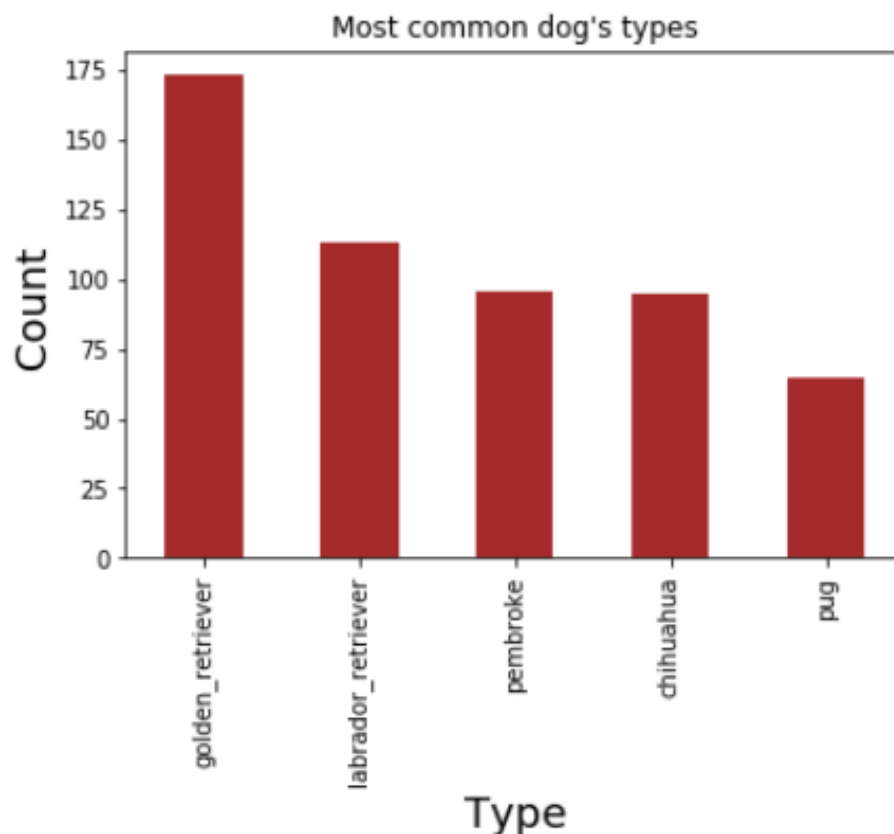

Because they're good dogs Brent. WeRateDogs has over 4 million followers and has received international media coverage.

In this project is used WeRateDogs's Twitter archive. This archive contains basic tweet data (tweet ID, timestamp, text, etc.) for all 5000+ of their tweets as they stood on August 1, 2017.

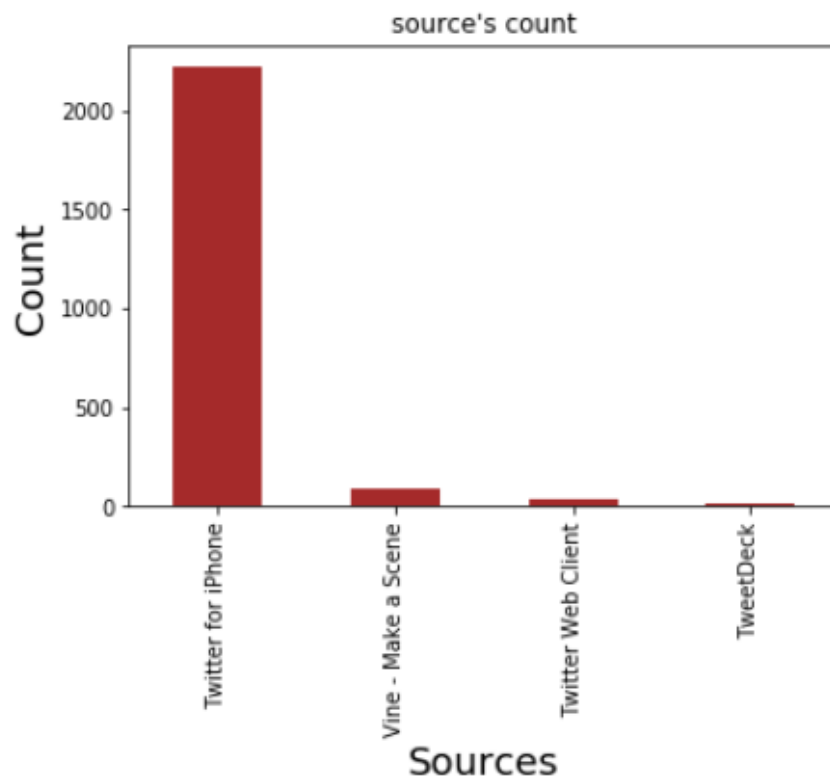

Insights and visualizations:

After gathering the data from the three resources and assessing them then cleaning them I was able to make some visualization and insights over more than 1900+ tweets, and there are the insights and visualizations I got

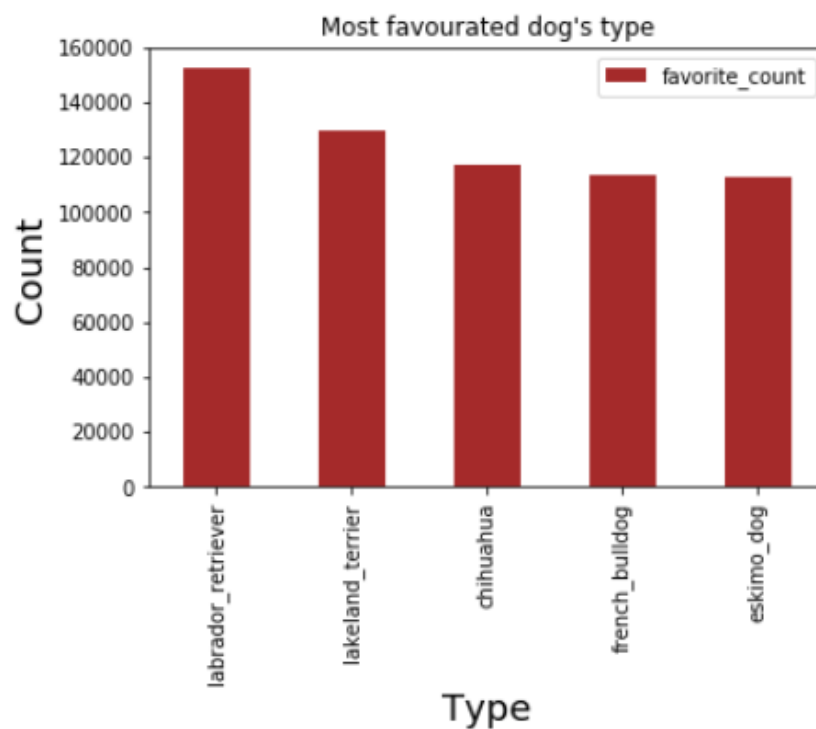

1. most common dog's types:
after cleaning and analyzing it is found that The most rated dog was golden retriever with 173 ratings
